What is **UNCONSCIOUS BIAS**?

An implicit association or attitude—about race or gender, for example—that:

- Operates beyond our control and awareness.
- Informs our perception of a person or social group.
- Can influence our decision-making and behavior toward the target of the bias.

**BIAS IS PERVERSIVE**

Analyses of tens of thousands of tests on implicit bias have revealed:

People can be consciously committed to equality, and work deliberately to behave without prejudice, yet still possess negative prejudices or stereotypes.

**Showing bias:**

- 88% of white people had a pro-white or anti-black implicit bias
- 83% of heterosexuals showed implicit bias for straight people over gays and lesbians

Large majorities of people also showed implicit biases for Christians over Jews, the rich over the poor, and men's careers over women's careers and are not reserved just for the dominant groups.

**MINORITY GROUPS ARE BIASED TOO**

Minorities internalized the same implicit biases as majority groups.

- 48% of blacks showed a pro-white or anti-black bias
- 36% of Arab Muslims showed an anti-Muslim bias
- 38% of gays and lesbians showed a bias for straight people over gays and lesbians.
UNCONSCIOUS BIASES ARE POWERFUL PREDICTORS OF BEHAVIOR

Implicit attitudes affect snap judgments, as well as decisions that are given careful conscious consideration.6

The effects of unconscious biases can be seen in action, especially if conscious controls over decision-making are lowered, for example when people are stressed, distracted, relaxed, or in competition.7

This is true even if unconscious biases are not aligned with conscious beliefs and convictions. For example, people with egalitarian views can harbor unconscious biases toward certain groups that affect their behaviors and decisions.8

BIASES CAN BE OVERCOME

Thinking about strong women leaders or seeing positive images of underrepresented groups can temporarily change unconscious biases.9

Working together in structured settings to solve shared problems can dramatically alter people’s attitudes about diversity.10

A person with biases will not necessarily always act in biased ways; it is possible to consciously override bias.11
